

Test Practice Exam

Generated on June 26, 2025

Difficulty: Easy

1. A bakery sells two types of cookies: chocolate chip and oatmeal raisin. On Monday, they sold a total of 75 cookies. If they sold 15 more chocolate chip cookies than oatmeal raisin cookies, how many of each type of cookie did they sell? Show your work and clearly explain the steps you took to arrive at your answer.

2. A rectangular garden has a perimeter of 24 meters. The length of the garden is twice its width. Calculate the area of the garden. Clearly show your steps, including the formulas you use and how you solve for the unknown variables.
